Professional Summary

Flutter Developer with 2.5+ years of experience building and releasing production applications for Android and iOS. Skilled in Flutter, Dart, Provider, Riverpod, GoRouter, REST APIs, Firebase, Google Maps, payment integrations, video processing, performance optimization, and Play Store/App Store release support. Contributed to live applications including Fulupo Consumer, Fulupo Store, and Selfitoons.

Professional Experience

Flutter Developer 2.5+ Years
DoubleTap Innovations and Technologies Pvt. Ltd. *India*

- Build and maintain production Flutter applications for Android and iOS using reusable widgets, responsive layouts, and scalable architecture.
- Integrate REST APIs, Firebase services, payment gateways, Google Maps, local storage, media-processing tools, and AI-powered workflows.
- Improve stability and performance by resolving crashes, memory issues, navigation defects, API failures, and UI rendering problems.
- Collaborate with backend, UI/UX, QA, and DevOps teams; prepare release builds and support production deployments.

Key Projects

Fulupo Consumer App | *Flutter, Provider, REST APIs, Firebase, Google Maps, Cashfree* Live on Google Play

- Developed and maintained an AI-powered grocery discovery and shopping application with nearby stores, cart, wishlist, ordering, payment, and delivery workflows.
- Integrated multimodal AI search through text chat, voice recordings, and uploaded product images.
- Connected AI responses with the product catalogue to recommend relevant products and suggest suitable recipes.
- Implemented API models, Cashfree payments, Firebase notifications, location services, order tracking, and production fixes.
- **Link:** Google Play

Fulupo Store App | *Flutter, REST APIs, File Upload, Excel Workflow* Live on Google Play

- Developed store-management features for product and inventory workflows in a production mobile application.
- Implemented bulk product-image uploads with request chunking, progress tracking, validation, and persistent state handling.
- Built an image-to-Excel workflow for generating, downloading, viewing, and sharing product data files.
- Handled API failures, file-download issues, empty states, retries, and user feedback for production reliability.
- **Link:** Google Play

Selfitoons | *Flutter, Riverpod, GoRouter, FFmpeg, Razorpay, Cashfree* Android & iOS

- Developed an AI-powered video-generation and social media application for Android and iOS.
- Architected a social feed supporting posts, follow/unfollow, likes, comments, and user engagement using Riverpod and GoRouter.
- Integrated Razorpay and Cashfree for premium subscriptions and implemented client-side video watermarking using FFmpeg.
- Built a Video Controller Manager that limits active controllers to improve memory usage, playback stability, and scrolling performance.
- **Links:** Google Play | App Store

Technical Skills

Core: Flutter, Dart, Provider, Riverpod, GoRouter, Responsive UI, Reusable Widgets
APIs and Services: REST APIs, JSON, Dio, Firebase Cloud Messaging, Google Maps
Payments and Media: Cashfree, Razorpay, FFmpeg, Video Playback
Tools and Practices: Git, GitHub, Android Studio, VS Code, Postman, FVM, Debugging, Performance Optimization, Release Support

Education

Anjalai Ammal Mahalingam Engineering College 2022
Bachelor of Engineering in Computer Science and Engineering *CGPA: 7.5 / 10*
